The Reality of Renovation

Replacing a bathtub may sound like a good idea, but the hidden costs quickly add up.

Basic tub costs	\$300
Demolition and removal	\$75—\$150
Plumber to reattach pipes	\$299
Tub installation	\$2,300—\$2,896

Total Investment **Nearly \$4,000!**

Why Renovate When you Can Resurface?

Resurfacing is a cost-effective, time-saving alternative to renovation. According to the national averages reported by HomeAdvisor.com, resurfacing areas rather than replacing them can drive real cost savings for property owners and managers.

Bathtub	
Resurface	Installation
\$405	\$2,301

Cabinet	
Resurface	Installation
\$2,671	\$4,887

Tile	
Resurface	Installation
\$443	\$1,809

Tile Flooring	
Resurface	Installation
\$443	\$1,763

Counter (30 sq. ft.)	
Resurface	Installation
\$931	\$2,689

The Benefits of Resurfacing

SAVES MONEY

On average, resurfacing costs 70—80% less than renovation and can restore the useful life of your fixtures for up to 15 years.

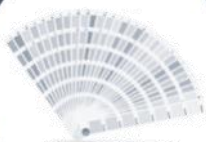

SAVES TIME

No permits required*, and a resurfaced area can typically be returned to service in less than 24 hours; renovations can take weeks or even months.

CLEANER WITH LESS WASTE

The typical resurfacing project generates less than one bag of waste; a renovation generates one dumpster or more.

DESIGN & FUNCTIONALITY

Your tired and worn out surfaces can have a good-as-new appearance that seamlessly blends into your updated design plans. Resurfacing offers an almost unlimited range of designs and precision color-matching capabilities, plus optional upgrades like an antimicrobial additive protects surfaces from the harmful effects of bacteria, mold, and odor.

SUSTAINABILITY

Eliminates the environmental costs of manufacturing a replacement surface and disposing of original surface.

BEFORE

AFTER

The Professional Resurfacing Process

Cleaning & Surface Preparation

- A) Clear work area, set up exhaust equipment, mask surfaces
- B) Thoroughly clean surface, repair chips/cracks, and prepare it for bonding to coatings

Primer Coat Applied

Spray apply 2-3 coats of primer

Optional:

- Low odor
- Low VOC
- Anti-slip

Multicolor Finish & Additives Applied (optional)

Spray apply 2-3 coats

Optional:

- Variety of colors & designs

Topcoat Applied

Spray apply 2-3 coats

Optional:

- Fast cure time
- Low odor
- Low VOC
- FDA compliant
- Anti-microbial

The resurfacing process requires special handling and safety equipment, and should only be done by a trained professional. Final design, color, and fleck sizes may vary based on ambient conditions and the style and technique preferences of the resurfacing professional.

Transforming Surfaces Since 1979

About Hawk Research Laboratories, LLC

Hawk is the recognized industry leading manufacturer of professional resurfacing systems used in residential, commercial, and industrial applications worldwide. We develop high performance premium products with attractive colors and designs, and enhanced functionality that are a cost-effective alternative to renovation.
