30+ YEARS IN THE BUSINESS

LATEST TECHNOLOGY

TRAINED PROFESSIONALS

Your parking lot carries your curb appeal! What will it say?

A well maintained lot will show visitors the property owner's investment in the business's aesthetics and safety

What is your lot saying about your property and your business?

SEALCOATING

- ⚠️ We use the best sealcoat product currently in the industry, **GemSeal Black Diamond Enduramax**
- ⚠️ Sealcoated pavements have a 20-50% longer lifespan, an undeniable enhanced appearance, and a smoother surface than unsealed pavement.

ASPHALT PATCHING

- ⚠️ Patching repairs parking lot potholes. Potholes occur when cracks increase in size and asphalt breaks off into smaller pieces.
- ⚠️ Hot patching is best suited for areas that require lots of asphalt.
- ⚠️ Infrared patching uses the existing asphalt to repair the hole; is seamless, takes little time, and is very cost-effective

CRACK SEALING & JOINT FILLING

- ⚠️ Our Hot Rubberized Crack Sealing eliminates gravel base saturation
- ⚠️ Prevents moisture from penetrating the pavement causing larger cracks/potholes. We attack the issues before they become a liability.

TRAFFIC SIGNS & PAVEMENT MARKINGS

- ⚠️ Striping, Speed Bumps, Car Stops, and Traffic Signs ensure your lot meets regulations and ADA requirements, enhances curb-appeal, and helps control pedestrian and vehicle traffic
- ⚠️ Maximize number of cars you can safely accommodate

ASPHALT PAVING

- ⚠️ No matter the size of the lot, Pavement Solutions has the crews and equipment to fit any and **all** of our customer's needs and budgets
- ⚠️ Asphalt assists in rainwater management, promotes the water cycle, and minimizes pollution.

SNOW REMOVAL

- ⚠️ Snow plowing, hauling, shoveling, ice control, and sidewalk clearing
- ⚠️ Our trucks are equipped to plow any size lot.
